Project Highlights

- Safely connects residential areas to schools, shopping, and parks.
- Constructs missing links of sidewalks in and around neighborhoods.
- Safely connects StarMetro users to stops.
- Estimated Cost: $50 million ($25 million each for County and City)

A complete and interconnected sidewalk network is an integral component of the local transportation network. Sidewalks allow residents and visitors to safely access schools, businesses, neighborhoods, and transit service. Sidewalks are especially important for the large number of residents who do not or cannot drive, and visitors rely on sidewalks to assist in navigating our local amenities.

The associated map lists possible areas for sidewalks to be determined by the County and City Commissions.
